# Apex 300

## Expandable Power System

All-in-One Solution for Every Scenario

The Apex 300 expandable power system, with its cutting-edge technologies, will revolutionize your power experience. Offering up to 11.52kW of output and 58kWh of capacity, it supports parallel connection and dual 120V/240V voltage for unmatched versatility. It ensures a smart, efficient, and secure power source for your home, RV trips, off-grid lifestyle, and more!

## Triple the Power Triple the Capacity

**Customized Solution | Space-Saving | Stable Performance**

Expand up to 11.52kW output and 58kWh capacity by parallel connection with 3 units and up to 18 battery packs. You can sustain up to 7 days off-grid or power through extended outages effortlessly.

## Dual 120V/240V Voltage for Whole-Home Use

**Power Everything | Easy Installation**

The Apex 300 delivers 120V and 240V dual voltage, so you can use high-power devices like dryers, central AC, EV chargers, water pumps, and kitchen appliances without affecting other devices like refrigerators or ovens.

## Hot-Swappable & Plug-and-Play

You can remove the Apex 300 or battery pack for outdoor use without shutting down the system, ensuring uninterrupted power supply to your home devices.

## Compact Size & Industry-Leading Energy Density

**Maximized Space Efficiency | Portable & Compact**

The Apex 300 features an all-new compact structure. The energy density is 40% higher than its peers, making it the most portable and parallel power solution in the industry.

## Universal Compatibility, Endless Possibilities

**Smart | Highly Adaptable | Easy Upgrade**

Apex 300 seamlessly integrates with a wide range of batteries, including the B300K, B300, and B300S, and is also future-proofed for upcoming battery packs. Access new features at minimal cost and meet increasing power needs.

**More to come, stay tuned!**
