Apex 300

Expandable Power System

All-in-One Solution for Every Scenario

Meet the Apex 300—an expandable power system designed to keep up with your evolving energy needs. With support for parallel connections, it delivers up to 11.52kW of output and 58kWh of capacity, making it perfect for home backup, RV adventures, or off-grid living.

Triple the Power Triple the Capacity

Customized Solution | Space-Saving | Stable Performance

Connect up to 3 units and 18 battery packs for a system that expands up to 11.52kW output and 58kWh capacity—enough to power essentials for up to 7 days off-grid or during extended outages.

Best-in-Class Energy Efficiency

Engineered for maximum energy savings, the Apex 300 cuts self-consumption by two-thirds compared to other brands and improves energy use by 200%. With 95% depth of discharge (DoD), it ensures every kilowatt-hour is fully utilized, setting a new benchmark for energy efficiency.

Plug-and-Play Design

The Apex 300 and battery packs can be removed for outdoor use without shutting down the system, ensuring uninterrupted power supply to connected household devices.

Compact Size & Industry-Leading Energy Density

Maximized Space Efficiency | Portable & Compact

The Apex 300 features an all-new compact structure. The energy density is 40% higher than its peers, making it the most portable and parallel power solution in the industry.

Universal Compatibility, Endless Possibilities

Smart | Highly Adaptable | Easy Upgrade

Apex 300 seamlessly integrates with a wide range of batteries, including the B300K, B300, and B300S, and is also future-proofed for upcoming battery packs. Access new features at minimal cost and meet increasing power needs.

More to come, stay tuned!
